

Californians and Education April 2017

Time Trends – Likely Voters

Methodology Note:

Findings for April 2017 are based on a survey of 1,705 California adult residents, with 65 percent interviewed on cell phones (1,109 interviews) and 35 percent interviewed on landline telephones (596 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 17 minutes to complete. Interviewing took place on weekend days and weekday nights April 2–11, 2017.

The April 2017 sampling error for the 1,036 likely voters, taking design effects from weighting into consideration, is ± 4.1 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
