

PARTICIPANTS

Arnold Bloom is a professor at the University of California, Davis, and holds the John B. Orr Endowed Chair in environmental plant sciences. He teaches a public online course on climate change, which has had more than 10,000 participants from all over the world. He has published articles on a range of topics from the economics of resource allocation in plants to the future of agriculture under rising carbon dioxide levels and has coauthored textbooks on plant physiology and plant mineral nutrition. He received a B.A. in physics from Yale University and a Ph.D. in biological sciences from Stanford University.

Hans Johnson is a senior and Bren fellow at PPIC. His work focuses on the dynamics of population change in California and policy implications of the state's changing demography, with a focus on higher education. At PPIC, he has conducted research on education projections and workforce skills, population projections, international and domestic migration, and housing. Before joining PPIC, he was senior demographer at the California Research Bureau, where he conducted research on population issues for the state legislature and the governor's office. He has also worked as a demographer at the California Department of Finance, specializing in population projections. He holds a Ph.D. in demography from the University of California, Berkeley.

David Lesher is director of government affairs at PPIC and is based in PPIC's Sacramento Center. Previously, he directed the New America Foundation's California Program, which sponsors a wide range of research, writing, and events on issues of critical importance to the future of California. Prior to that, he covered politics and government for 15 years at the *Los Angeles Times*, where his roles ranged from lead reporter in the Sacramento bureau to assistant national editor on the paper's presidential campaign desk.

Joseph Moreau is the executive sponsor of the Online Education Initiative and vice chancellor of technology at Foothill-De Anza Community College District. Previously, he has been manager of the Instructional Resources Center at Pasadena City College, dean of learning resources at West Hills College, dean of academic information services at Mira Costa College, and chief technology officer for State University of New York at Oswego. He has served on the boards of a number of nonprofit and professional organizations, including the California Community Colleges Chief Information Systems Officers Association, the Corporation for Education Network Initiatives in California, the Oracle Higher Education User Group, and the SUNY Faculty Advisory Council for Teaching and Technology. He holds a B.A. in visual arts from the University of California, San Diego, and an M.A. in education from California State University, Los Angeles.

Ashley Skylar is the quality assurance manager of academic technology services at California State University, where she supports efforts related to the quality of online and hybrid courses. Previously, she was the director at the Center for Excellence and Innovation in Online Education at Cal State Online and participated in several system-wide technology initiatives. She has more than ten years of experience in teaching online courses and has published numerous articles about distance education. She holds a Ph.D. in education/instructional technology and learning disabilities from the University of Nevada, Las Vegas.
