- THE COMPOSITION OF ELECTORATE HAS SHIFTED SINCE LAST GUBERNATORIAL ELECTION.

The number of registered voters in California rose by more than one million between the November 2006 gubernatorial election and the June 2010 gubernatorial primary (from 15.8 to 17 million), and the composition of the electorate has shifted. Democrats constitute $44.5 \%$ of registered voters (up 3 points since 2006), Republicans make up $30.8 \%$ (down 3.5 points), and decline-to-state or independent voters account for $20.2 \%$ (up 1.5 points). Our surveys indicate that among those most likely to vote, $44 \%$ are Democrats, $35 \%$ are Republicans, and 18\% are independents, relatively unchanged since 2006.

- CONSERVATISM HAS GROWN AMONG REPUBLICANS AND INDEPENDENTS.

Among Republican likely voters, the vast majority say they are politically conservative ( $73 \%$ ), up 8 points since 2006 ( $65 \%$ ). Although a plurality of independent likely voters consider themselves moderate ( $40 \%$ ), the percentage identifying as conservative ( $31 \%$ ) has increased 5 points since 2006 ( $26 \%$ ); 29\% say they are liberal ( $32 \%$ in 2006). Independents continue to lean more toward the Democratic than Republican Party ( $38 \%$ vs. $30 \%$ ), but Democratic leanings are down 4 points since 2006;32\% say they lean toward neither party. Among Democratic likely voters, $50 \%$ identify as liberal, $32 \%$ as moderate, and $18 \%$ as conservative, similar to 2006.

- THE CONSERVATIVE ATTITUDE TOWARD TAXING AND SPENDING HAS ALSO MADE GAINS.

Likely voters in 2006 were slightly more likely to prefer paying higher taxes in return for having a state government that provides more services (49\%) than paying lower taxes and having fewer services (44\%). Today, they are slightly more likely to prefer lower taxes and fewer services ( $48 \%$ ) than higher taxes and more services ( $43 \%$ ). While preferences among Democrats are similar to 2006 (two-thirds prefer higher taxes and more services), the preference for lower taxes and fewer services grew 7 points to $74 \%$ among Republicans and 5 points to $50 \%$ among independents.

- THE SHARE OF LATINO LIKELY VOTERS HAS RISEN SINCE 2006.

Since 2006, the percentage of likely voters who are Latino has risen 4 points ( $14 \%$ to $18 \%$ ), while the share of whites has declined 6 points ( $72 \%$ to $66 \%$ ). The largest shift in racial/ethnic composition occurred among Democratic likely voters: whites now make up $54 \%$ (down 8 points), Latinos $26 \%$ (up 6 points), blacks $11 \%$ (no change), and Asians $6 \%$ (up 2 points). Republicans have a far greater proportion of whites ( $82 \%$ ) and smaller proportions of Latinos ( $9 \%$ ) and blacks ( $1 \%$ ), while the share of Asians ( $5 \%$ ) is similar to Democrats; the racial/ethnic mix of Republicans has changed little since 2006. Among independents, $65 \%$ are white (down 3 points), $15 \%$ Latino, $6 \%$ black, and $9 \%$ Asian.

- THE SHARE OF LIKELY VOTERS WITH HIGHER INCOMES HAS RISEN; OTHER DEMOGRAPHICS REMAIN SIMILAR. The share of likely voters across parties with household incomes of at least \$80,000 has grown since 2006 (up 6 points to $38 \%$ among Democrats, up 7 points to $47 \%$ among Republicans, and up 7 points to $44 \%$ among independents). Compared to Republicans and independents, Democrats still have the greatest share of voters with incomes under $\$ 40,000$. Most likely voters across parties are at least 35 years old; independents have the fewest voters age 55 and older ( $32 \%$ versus $41 \%$ of Democrats and $47 \%$ of Republicans). Still, the share of older voters is up 6 points among independents since 2006. As in 2006, at least half of the likely voters across parties are college graduates. Democrats are represented by more women than men ( $58 \%$ to $42 \%$ ), independents by more men ( $60 \%$ men, $40 \%$ women), and Republicans by slightly more men ( $52 \%$ men, $48 \%$ women).
