

Californians and Their Government

January 2018

Time Trends – Likely Voters

Methodology Note:

Findings for January 2018 are based on a survey of 1,705 California adult residents, with 70 percent interviewed on cell phones (1,194 interviews) and 30 percent interviewed on landline telephones (511 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 17 minutes to complete. Interviewing took place on weekend days and weekday nights January 21–30, 2018.

The January 2018 sampling error for the 1,042 likely voters, taking design effects from weighting into consideration, is ± 4.35 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
