

Californians and Their Government

January 2017

Time Trends – Likely Voters

Methodology Note:

Findings for January 2017 are based on a survey of 1,702 California adult residents, with 60 percent interviewed on cell phones (1,021 interviews) and 40 percent interviewed on landline telephones (681 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 21 minutes to complete. Interviewing took place on weekend days and weekday nights January 22–31, 2017.

The January 2017 sampling error for the 1,107 likely voters, taking design effects from weighting into consideration, is ± 4.1 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
