

Californians and Education—April 2020

Full Crosstabs – Likely Voters Only

Methodology Note:

Findings are based on a survey of 1,633 California adult residents, conducted online using the Ipsos KnowledgePanel. Interviews were conducted in English and Spanish according to the respondents' preferences. The median time to complete the survey was 18.5 minutes. Interviews were conducted from April 1–9, 2020.

These crosstabs are based on a subgroup of 1,091 California adult likely voters. The sampling error, taking design effects from weighting into consideration, is ± 3.7 percent at the 95 percent confidence level for the unweighted sample of 1,091 likely voters. The sampling error for unweighted likely voter subgroups is larger. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org

Note:

For questions asked only of public school parents (Q48 – Q51) or asked only of parents with children in the household (Q63 – Q64, Q69 – Q71), please refer to the Full Crosstabs – All Adults document.
