

Californians and Their Government

January 2020

Time Trends – Likely Voters

Methodology Note:

Findings for January 2020 are based on a survey of 1,707 California adult residents, with 75 percent interviewed on cell phones (1,260 interviews) and 25 percent interviewed on landline telephones (447 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 18 minutes to complete. Interviewing took place on weekend days and weekday nights January 3-12, 2020.

The January 2020 sampling error for the 967 likely voters, taking design effects from weighting into consideration, is ± 4.6 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
