

Californians and Their Government

May 2019

Time Trends – Likely Voters

Methodology Note:

Findings for May 2019 are based on a survey of 1,713 California adult residents, with 70 percent interviewed on cell phones (1,198 interviews) and 30 percent interviewed on landline telephones (515 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 18 minutes to complete. Interviewing took place on weekend days and weekday nights May 19-28, 2019.

The May 2019 sampling error for the 1,123 likely voters, taking design effects from weighting into consideration, is ± 4.1 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.
