

# Californians and Their Government

## September 2021

### Time Trends – Likely Voters

#### Methodology Note:

Findings for September 2021 are based on a survey of 1,706 California adult residents, with 75 percent interviewed on cell phones (1,254 interviews) and 25 percent interviewed on landline telephones (452 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. The sample included 510 respondents reached by calling back respondents who had previously completed an interview in PPIC Statewide Surveys in the last six months. Interviews took an average of 18 minutes to complete. Interviewing took place on weekdays and weekday nights from August 20–29 2021.

The September 2021 sampling error for the 1,080 likely voters, taking design effects from weighting into consideration, is  $\pm 4.5$  percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact [surveys@ppic.org](mailto:surveys@ppic.org)
