

# Californians and Their Government October 2022

## Time Trends – Likely Voters

### Methodology Note:

Findings are based on a survey of 1,715 California adult residents with 74 percent interviewed on cell phone (1,263 interviews) and 26 percent interviewed on landline telephones (452 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. The sample included 569 respondents reached by calling back respondents who had previously completed an interview in PPIC Statewide Surveys in the last six months. Interviews took an average of 19 minutes to complete. Interviewing took place on weekdays and weekday nights from October 14–23, 2022.

The October 2022 sampling error for the 1,111 likely voters, taking design effects from weighting into consideration, is  $\pm 5.1$  percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact [surveys@ppic.org](mailto:surveys@ppic.org)
