

Californians and Education April 2018

Time Trends – All Respondents

Methodology Note:

Findings for April 2018 are based on a survey of 1,704 California adult residents, with 70 percent interviewed on cell phones (1,193 interviews) and 30 percent interviewed on landline telephones (511 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 17 minutes to complete. Interviewing took place on weekend days and weekday nights March 25–April 3, 2018.

The sampling error for April 2018, taking design effects from weighting into consideration, is ± 3.2 percent at the 95 percent confidence level for the total unweighted sample of 1,704 adults. This means that 95 times out of 100, the results will be within 3.2 percentage points of what they would be if all adults in California were interviewed. It is ± 5.5 for the 523 parents and is ± 6.2 for the 391 public school parents. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.
